Scope of the Journal

ISSN: 1755-8913 (Print), ISSN: 1755-8921 (Online)

Management science should help different managers and policy makers to make optimal, if possible, or satisfactory, at least, informed decisions. IJAMS builds six interfaces: between management science theory and application; between management scientists and managers; between "hard" decision models and "soft" decision models; between deterministic and probabilistic models; between a specific strategy and an individual model; and finally, between a corporation and its environment, as well as the whole of society.

Topics covered include:

- Business process management, strategy, strategic management
- Computer sciences, data warehousing/mining
- Decision analysis, soft decision making
- Engineering management, financial/industrial/marketing engineering
- Information systems and technology
- Interdisciplinary management, knowledge management
- Mathematics, operations, operational research/management
- Multidisciplinary research
- Organisation performance
- Political science, public sector
- Production/supply chain management
- Psychology
- Quantitative/qualitative management, statistics
- Revenue, risk, services management
- Social issues, sociology
- Systems engineering
