# Scope of the Journal

ISSN: 1742-7185 (Print), ISSN: 1742-7193 (Online)

*Computational science and engineering is an emerging and promising discipline in shaping future research and development activities in academia and industry, in fields ranging from engineering, science, finance, and economics, to arts and humanities. New challenges arise in the modelling of complex systems, sophisticated algorithms, advanced scientific and engineering computing and associated (multidisciplinary) problem-solving environments. IJCSE addresses the state of the art of all aspects of computational science and engineering, highlighting computational methods and techniques for science and engineering applications.*

## Topics covered include:

- Scientific and engineering computing, related/interdisciplinary applications
- Problem-solving environments, complex systems
- Advanced numerical computation and optimisation
- Parallel and distributed computing
- Web-based and service computing
- Performance modelling, evaluation and optimisation
- Wearable computing
- Cognitive computing and networks
- Programming models in GPUs and cloud
- Distributed/federated information; knowledge management/discovery
- Big data mining/applications; data analytics algorithms/applications
- Swarm and artificial intelligence
- Modelling/simulation, visualisation, virtual/augmented reality
- Remote sensing and multi/hyperspectral imaging
- Computational finance
