Scope of the Journal

ISSN: 2398-0311 (Print), ISSN: 2398-032X (Online)

IJDSSS provides a unifying framework for a wide range of engineering disciplines and industrial applications, highlighting experimental applications and industrial studies. It encompasses practical aspects of the theory and methods of electrical engineering, and the synergetic integration of systems engineering with electronic, intelligent computer control and signal analysis in the design and manufacture of industrial products and processes. It thus brings together several specialities and research areas to realise significant industrial applications.

Contents:

IJDSSS publishes original papers, review papers, technical reports, case studies and book reviews. Special Issues devoted to important topics in the area of digital signals and smart systems will occasionally be published.

Topics covered include:

- Digital signals
- Signal processing
- Image and video processing
- Speech processing
- Pattern recognition
- Communication, wireless communications
- Information technology
- Sensors and measurements
- Power systems
- Monitoring, diagnosis and fault tolerance
- Renewable energies
- Advances in control systems and control theory
- Intelligent systems
- Smart systems
- Robotics and mechatronics

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijdsss where you can:

- Read about the journal's aim, scope and readership
- View editorial board details
- Find out about calls for papers and how to submit
- Find out about subscription options, in print, online or as part of a journals collection

You can order online at www.inderscienceonline.com or download an order form from www.inderscience.com/subform.

This title is part of the Computing and Mathematics Collection (see www.inderscience.com/cm). For library collection subscriptions or for a free institutional online trial, please contact subs@inderscience.com.
