Scope of the Journal

ISSN: 1755-1587 (Print), ISSN: 1755-1595 (Online)

IJDSS proposes and fosters discussion on the development of novel computational intelligence techniques and their application to support systems used by defence personnel. The scope of application covers strategic, tactical and operational decision-making across the entire defence sector, covering areas such as intelligence gathering and analysis, capability assessment, tactics modelling and evaluation and logistics management as well as military systems integration and both semi-autonomous and autonomous systems.

Contents:

IJDSS publishes original papers, review papers, technical reports, case studies, conference reports, management reports, book reviews, notes, commentaries, and news. Special Issues devoted to important topics in Defence and Computational Intelligence will occasionally be published.

Topics covered include:

- Agent-based systems
- Machine learning
- Situation awareness
- Reasoning models
- Human/agent teams
- Cognitive modelling
- Experimental design
- Behaviour modelling
- Knowledge management
- Systems of systems
- Data mining automation

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijidss where you can:
