# Scope of the Journal

ISSN: 1746-6962 (Print), ISSN: 1746-6970 (Online)

*IJIR publishes contemporary, cutting-edge research on all aspects of inventory theory to foster discussion among researchers, practitioners, and educators on the management and control of inventories. IJIR differentiates itself from other related journals by being fully devoted to inventory research. It aims to be an important and authoritative source of information for inventory theory. It also covers topics pertaining to the interfaces between inventory management and other disciplines, such as marketing (e.g. inventory and pricing problems), finance (e.g. risk analysis in inventory management), and information systems.*

## Content

IJIR publishes original, high-quality research in inventory management. Normative and methodological research, empirical studies, case studies and innovative applications are appropriate, provided there is a significant contribution to the inventory literature or a high level of practical managerial relevance. State-of-the-art review papers that examine and evaluate recent streams of inventory research will also be considered. Special Issues devoted to important topics in inventory research will occasionally be published.

## Topics covered include:

- Deterministic/stochastic inventory models
- Single/multi-echelon inventory problems
- Static and dynamic inventory control
- Empirical research in inventory management
- Case studies in inventory
- Interfaces between inventory management and other areas (marketing, finance, etc)
- Inventory management in supply chains
- Retail inventory management
- Manufacturing inventory research
- Revenue management
- Information systems for inventory control (RFID, ERP, etc)
- Transportation inventory networks
- Inventory management in lean systems
- Operational and strategic issues in inventory control
