Scope of the Journal

ISSN: 1748-5037 (Print), ISSN: 1748-5045 (Online)

In today's global economy, the most successful engineering managers rely on a combination of technical skills and business principles. Industrial and systems engineering (ISE) aims at imparting fundamental knowledge to develop the ability to address complex industrial issues, highlighting how to design, run, control and optimise production systems. IJISE addresses the development of ISE principles, tools, systems and methods with special emphasis on the applications of ISE techniques and tools in improving organisational productivity and competitiveness in global markets.

Topics covered include:

- Engineering economic analysis
- Computer methods for engineering
- Engineering experimental design
- CIMS, robotics and automation
- Quality engineering, environment risk analysis
- Systems reliability engineering, maintenance analysis
- Human factors/ergonomics in design
- Simulation modelling/analysis
- System design and control systems, concurrent engineering
- Production systems analysis/design
- Facilities layout/design
- Financial/investment engineering
- Information systems, ICT, AI/expert systems design
- Project management, decision support systems
- Technology management/transfer

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijise where you can:

- View sample articles in full text HTML or PDF format
- Sign up for our free table of contents new issue alerts via e-mail or RSS
- View editorial board details
- Find out about how to submit your papers
- Find out about subscription options, in print, online or as part of a journals collection

You can order online at www.inderscienceonline.com or download an order form from www.inderscience.com/subform.

This title is part of the Science, Engineering and Technology Collection (see www.inderscience.com/set). For library collection subscriptions or for a free institutional online trial, please contact subs@inderscience.com.
