Scope of the Journal

ISSN: 1748-569X (Print), ISSN: 1748-5703 (Online)

IJITST is an international refereed journal dedicated to the advancement of the theory and practical implementation of secured internet transactions and to fostering discussions on information technology evolution. IJITST aims to provide a highly professional and comparative academic research forum that promotes collaborative excellence between academia and industry.

Contents:

IJITST publishes original papers, case studies and technical reports, and provides an international forum which is an authoritative source of information in the field. All papers undergo a rigorous peer review process. Special Issues devoted to important topics in secured internet transactions and information technology evolution will also be published.

Topics covered include:

- Networked system architecture and protocols
- Networked system services and applications
- Networked system security, privacy and trust
- Digital crypto-currencies in networked systems
- Incentives in networked systems
- Malware and ransomware targeting networked systems
- Rootkit and bootkit targeting networked systems
- Security vulnerabilities in networked systems
- Offensive security for networked systems
- Reverse engineering
