Scope of the Journal

ISSN: 1755-8255 (Print), ISSN: 1755-8263 (Online)

IJKWI addresses techniques, systems, methods and applications that help the World Wide Web transform from a static data and information repository into an interactive, dynamic, transparent and secure knowledge and service network. The Web has become a ubiquitous tool for finding/sharing information, and conducting business, learning and entertainment. IJKWI is committed to deepening the understanding of enabling technologies for applying/developing the Web as a global information repository as well as computational, cognitive and social foundations of the Web.

Contents:

IJKWI publishes original papers, review papers, technical reports, survey papers, case studies, conference reports, book reviews, notes, commentaries, and issues. Special issues devoted to important topics in knowledge and web intelligence will occasionally be published.

Topics covered include:

- Intelligently searching/navigating
- Personalised access and recommender systems
- Innovations, applications, issues in intelligent technologies
- XML data mining, querying, management
- Ontology generation, learning, reasoning
- Semantic Web and Web 2.0
- Web usage, content, structure mining
- Web-based decision support systems
- Intelligent human-web interaction
- Social network analysis and Web blog mining
