Scope of the Journal

ISSN: 1755-0653 (Print), ISSN: 1755-0661 (Online)

IJMEI promotes an understanding of the structural/functional aspects of disease mechanisms and the application of technology towards the treatment/management of such diseases. It seeks to promote interdisciplinary collaboration between those interested in the theoretical and clinical aspects of medicine and to foster the application of computers and mathematics to problems arising from medical sciences. IJMEI includes authoritative review papers, the reporting of original research, and evaluation reports of new/existing techniques and devices. Each issue also contains a comprehensive information service.

Topics covered include:

- Hospital information/medical record systems, data protection/privacy
- Disease modelling/analysis, evidence-based clinical modelling/studies
- Computer-based patient/disease management systems
- Clinical trials/studies, outcome-based studies/analysis
- Electronic patient monitoring systems
- Nanotechnology in medicine, medical applications
- Tissue engineering, artificial organs, biomaterials design
- Healthcare standards, service standardisation
- Controlled medical terminology/vocabularies
- Nursing informatics, systems integration
- Healthcare/hospital management, economics
- Medical technology, intelligent instrumentation, telemedicine
- Medical/molecular imaging, disease management
- Bioinformatics, human genome studies/analysis
- Drug design
