Scope of the Journal

ISSN: 1745-7645 (Print), ISSN: 1745-7653 (Online)

Globalisation of market and operations places tremendous pressure in making timely and accurate decisions using data analysis and more accurate information. This signifies the importance of developing suitable operations research (OR) techniques and models. IJOR covers new theory and application of such techniques and models that include inventory, queuing, transportation, game theory, scheduling, project management, mathematical programming, decision-support systems, multi-criteria decision making, artificial intelligence, neural network, fuzzy logic, expert systems, simulation. New theories and applications of OR models are welcome.

Topics covered include:

- Information technology and OR theory/applications
- Effective use of scarce resources under dynamic/uncertain conditions
- Decision theory/analysis
- Probabilistic and stochastic models
- OR techniques in finance, marketing
- Manufacturing and operations theory/practice
- Operations models in services
- Logistics and OR models/techniques
- Applications of OR techniques
- Military and OR models
- OR in public sector organisations
- Statistics modelling
- OR and telecommunication/networking
- Optimisation
- Simulation

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijor where you can:

- View sample articles in full text HTML or PDF format
- Sign up for our free table of contents new issue alerts via e-mail or RSS
- View editorial board details
- Find out about how to submit your papers
- Find out about subscription options, in print, online or as part of a journals collection
