

International Journal of

Power and Energy Conversion

Scope of the Journal

IJPEC highlights the latest trends in research in the field of power generation, transmission and distribution. Nowadays, there exist significant challenges in the power sector, particularly in the emerging electricity markets. A key challenge to the operation, control and protection of the power system is due to the proliferation of power electronic devices in the power systems. The main thrust of IJPEC is to bring out the latest research trends in the power sector as well as in energy conversion technologies.

Contents

IJPEC publishes original papers, review papers, technical reports, and case studies. Special Issues devoted to important topics in power system and energy conversion will occasionally be published.

Subject areas:

Topics of interests to IJPEC include, but not limited to the following:

- Power system modelling and analysis
- Computing and economics
- FACTS and HVDC
- Challenges in restructured energy systems
- Power system control and operation
- Power system communication and SCADA
- Power system relaying and protection
- Energy management systems and distribution automation
- Applications of power electronics to power systems
- Power quality
- Distributed generation and renewable energy sources
- Electrical machines and drives
- Utilisation of electrical energy
- Modelling and control of machines
- Fault diagnosis in machines and drives
- Special machines

Content of Inaugural Issue of IJPEC

VOL. 1(1), 2009

VSC with zigzag transformer based electronic load controller for a stand-alone power generation

Gaurav Kumar Kasal and Bhim Singh

Series-parallel power system optimisation using a harmony search algorithm

A. Zebalah, E. Chatelet, M. El Samrout, F. Yalaoui and Y. Massim

Power quality indices measurement using the S-transform

Ameen Gargoom, Nesimi Ertugrul and Wen L. Soong

Distribution system insulator monitoring using video surveillance and support vector machines for complex background images

Velaga Sreerama Murthy, Sumit Gupta and D.K. Mohanta

Shaping the stator teeth of an isolated stator sections switched reluctance motor to deliver high output torque

Eyhab El-Kharashi and Pia Salminen

Multiobjective optimal var dispatch considering control variable adjustment costs

M.A. Abido

Identification of IIR systems using comprehensive learning particle swarm optimisation

Babita Majhi and Ganapati Panda
