Scope of the Journal

ISSN: 1744-7550 (Print), ISSN: 1744-7569 (Online)

Investments in postharvest research/infrastructure can yield high rates of return comparable to - and often higher than - investments in on-farm production. IJPTI offers innovative research findings and industry best practices on postharvest handling techniques, agro-processing and marketing of food and biological products of plant and animal origin. It addresses scientific/engineering/technological/policy/developmental issues regarding postharvest management aimed at reducing food losses, maintenance and assurance of product quality, safety and traceability, highlighting postharvest innovation and knowledge/technology transformation into useful products/services in agri-food/biological industries.

Topics covered include:

- Effects of preharvest management on postharvest quality
- Maturity assessment and prediction
- Product quality, safety, control
- Postharvest pathology, disease control, treatments, value-addition
- Food traceability, identity preservation: policy, legislation, enabling technologies
- ICT in postharvest management
- Education/training methods for sustainable postharvest development
- Innovative packaging and storage technology: controlled/modified atmospheres
- Instrumentation/control systems, postharvest laboratory standards/accreditation
- Agro-processing, incl. minimal processing, handling systems, damage reduction
- Assessment/reduction of postharvest losses
- Cool-chain management, drying technology, kinetics
- Agri-food trade and market access, functional foods and human health
- Impacts/benefits of postharvest research, emerging/novel technologies
- Postharvest project design/management/evaluation, case studies, best practice automation

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijpti where you can:
