

International Journal of

SATELLITE COMMUNICATIONS POLICY AND MANAGEMENT

Scope of the Journal

IJSCPM aims to improve the state-of-the-art of worldwide research in the areas of satellite systems, networks, components, policy, management and services by publishing high-quality papers in this area, and by exposing the readers to the various methodologies, tools, techniques, algorithms, results, applications involved.

Contents

IJSCPM will publish research contributions that significantly advance the state-of-the-art research in this area. Papers reporting the practical applications of different theoretical approaches, policy and management will be of particular interest to the journal. Good quality survey articles will also be of interest to the journal. Special Issues devoted to important topics will occasionally be published.

Subject coverage:

Topics include, but are not limited to, the following:

- Satellite communication systems
- Satellite networks and networking
- Multimedia mobile broadcasting and digital television
- Deep space communications
- Nano satellites and nano-rockets
- Equipment - earth stations/terminals, payloads, launchers and components
- Remote sensing, radar and sonar
- RF and microwave techniques
- Antennas, propagation and interference
- Enabling technologies - coding/modulation/signal processing, etc.
- Delay tolerant networking
- Protocols design and performance analysis
- IP over satellite and QoS support
- Radio resource management
- Galaxy-scale satellite communications and exploration missions
- Electronic warfare target location systems
- Fade countermeasures
- Military applications
- Mobile/broadcast/navigation/fixed services
- Security, privacy, and trust
- Standards and regulation
- Service provision, marketing, economics and business aspects
- Network management and control issues
- Policy and management issues

What the editors say about IJSCPM

I am excited about the prospects for assisting with this new journal and honoured to have been invited to participate on the editorial board. I hope that IJSCPM will foster new research and applications areas in satellite communications systems and applications. This journal will become, without any doubt, a leading journal in this new and exciting field.

Zhili Sun,
University of Surrey, UK

The new IJSCPM will cover an area of satellite communications policy and management that is currently not adequately covered. I see that satellite communications resource management and applications will play a major role in developing new technological products. Hence, I am expecting that the new journal will be a great hit with every researcher who is working on future innovations. It gives a great pleasure to be part of the IJSCPM team.

Maode Ma,
Nanyang Technological University, Singapore

It is certainly an honour for me to serve as an Editorial Board member for this journal. I do believe that IJSCPM will continue to be the prime channel to report cutting-edge researches in this exciting and growing area.

Abdallah Shami,
University of Western Ontario, Canada

I am so honoured to be part of the Editorial Board of your new journal, IJSCPM, and believe that it will be extraordinarily successful. This will no doubt broaden the knowledge of our research community and will lead to new and exciting results in the field. I believe it will quickly be one of the leading journals in the area of satellite communication systems and applications.

Lei Shu,
Osaka University, Japan

I am honoured to be a part of this exciting new journal which addresses an important and emerging area of research. I am confident that IJSCPM will have a significant impact on the community.

Jalel Ben-Othman,
Versailles University, France
