The SMi Group is proud to announce the return of the 11th annual ADMET conference taking place in London on the 13th – 14th June.

This event will explore novel and emerging non-clinical ADME approaches, structure based prediction of ADME properties, PK/PD modelling to validate drug targets, toxicity and much more.

ADMET 2016 will provide a series of practical case studies, interactive roundtables and panel discussions facilitated by leading industry experts that will provide executives with useful tools and best practices to:

- Discover application of PBPK to drug development in rare diseases
- Review the role of drug transporters in drug delivery to CNS diseases
- Learn about better models for understanding, predicting and avoiding drug induced liver injury
- Discuss in silico approaches to evidence-based mechanistic modelling
- Analyse early dose predictions – a valuable tool in risk assessment and optimisation of small molecules
