

11th annual Military Space Situational Awareness
18-19 April 2016, Holiday Inn Kensington Forum, London, UK
www.military-space.com/inderscience

Space has become a very influential factor in warfare with satellites being used for communications, reconnaissance, navigation and intelligence. With threats increasing to our national space infrastructures such as cyber-attacks, space weather, space debris, collisions with other satellites and anti-satellite missiles; there are all real dangers that can cripple a military force's fighting capability.

The 11th annual Military Space Situational Awareness conference is well timed to bring together military space users and private industry specialists from around the world to discuss the challenges of gathering information in space and how they can be overcome through intimate cooperation and research and development.

Register online at: www.military-space.com/inderscience
