

The world's second richest country in inland water resources with as many as 6000 rivers, rivulets and tributaries, Nepal can meet not just its own electricity needs, but also serve energy hungry neighbors like Bangladesh and India. Yet, Nepal's 30 million people and most of South Asia's 1.7 billion people remain starved of electricity.

Nepal's water resources must be utilized to create jobs and improve its economy. Huge future returns are associated with today's risks. With the own demand for electricity growing at 9% annually, with the desire to be energy-independent country, It is time that both local and international players shall join hands to tackle the challenges ahead of the industry.

Nepal Power Investment Summit 2016 combines Conference, Exhibitions, Project Investment Seminar and Business Trade Mission creating a perfect platform for all concerned industrial players to share knowledge and to expand business contacts in this emerging exploration frontier. The theme of the Conference session is Nepal– the Future Battery of South Asia. Key stakeholders from government agencies, state utility company, IPPs, contractors, financiers, and others concerned players will gather during the event. Highlight of the event is as follows: Business Trade Mission (2 Day Event - Business Meeting & Site Visit)

Project Investment Seminar (Project Showcase from Project Owners, Investment Opportunities for investors )

220+ Conference participants

30+ Exhibiting opportunities

35+ Speakers

Nepal Power Investment Summit 2016 will provide you with a one-stop learning and networking experiences to obtain the first-hand updates of Nepal's power market. We welcome your participation and let's work for the bright future of the power development in Nepal!
