

Innovation Excellence for Life Sciences

November 30-December 1, 2016

Boston, MA

<http://bit.ly/2dSeX35>

The healthcare industry is a highly competitive and volatile environment, where life science organizations not only strive to develop first-in-class products, but also vie for market opportunities. Innovation, therefore, is key for ensuring customer deliverables and maintaining a competitive edge. This conference aims to catalogue best practices in fostering a culture of innovation necessary to drive enterprise performance.

By attending the **Innovation Excellence for Life Sciences** conference, delegates will receive practical knowledge and advice from leading innovation, product and business development, and R&D professionals on how to establish an innovation-first and friendly organizational framework, develop external partnerships to bolster project potential, and curate winning projects that will garner a market advantage.
