Register by the 30th of September and save £100

Europe's leading military satellite communications event, described by the audience as "**the best networking event**" in their calendar will bring together over 450 of the industry's key senior military representatives alongside the world's leading SatCom solutions providers and operators.

Global MilSatCom 2016 will feature 3 days' worth of exceptional keynote addresses, industry-leading presentations and interactive panel discussions to allow attendees the opportunity to hear about the newest technologies to help them develop more secure satellite communications.

In this unrivalled event products and services will be unveiled, there shall be new updates on military SatCom programmes and crucial topics will be discussed. These include the potential for greater exploitation of commercial services to satisfy end-user military requirements, how the great demand for more resilient and protected SatCom is being satisfied, the potential for SatCom on airborne platforms in years to come as well as discussion on allied partnerships and interoperability as a solution for governments and militaries across the globe.

KEY REASONS TO ATTEND GLOBAL MILSATCOM 2016:

- **Unrivalled expert speaker panel includes key decision makers from** U.S. Department of Defence, Italian Ministry of Defence, Danish Defence Command, UAE Space Agency, Brazilian Air Forces, Hungarian Defence Forces, European Space Agency, Italian Ministry of Defence, Belgian Defense, New Zealand Defence Force, DISA, DGA France, Norwegian Defence Logistics Association, Department of National Defence Canada, U.S Marine Corps Forces for Europe and Africa, U.S Air Force, SES, Airbus Defence and Space, Eutelsat, Raytheon, Hughes Network Systems, Intelsat General, Viasat, Boeing, Thales, Newtec, OneWeb, Lockheed Martin Space Systems, Northern Sky Research, O3b Networks, Advantech Wireless, LuxGovSat and many more.
- **Hear over 35 key presentations** discussing the latest topics on SatCom including: SatCom for governmental use, the SatCom AoA in the U.S, the renewal of European programmes and how emerging markets are satisfying their MilSatCom requirements, transforming MilSatCom with commercial technologies, evolution of protected resilient SatCom, TNS and HTS, Wideband Global SatCom, allied partnerships and interoperability and so much more.
- Learn about **collaboration between industry and military** on current and future SatCom issues
- Understand **the latest technological solutions** and how these best suit the end-user

PLUS 2 EXCLUSIVE CONFERENCE WORKSHOPS (7th November 2016):

- Workshop A: **Architecting Space Systems**. Hosted by The Aerospace Corporation
- Workshop B: **The Low Earth Orbit Small Satellite Constellation Revolution**. Hosted by Surrey Satellite Technology Ltd.
