Connected Manufacturing – Enabling the Factory of the Future through Digital Transformation

Join the **International SAP Conference for Manufacturing** (3-4 November, The Hague, Netherlands) to hear the very latest news, innovation, and best practices for both the discrete and process manufacturing industries.

The main conference features a user-focused agenda specifically designed for both discrete and process manufacturing industries, combining SAP keynotes and solution updates to ensure that attendees are fully up to date with the latest roadmap from SAP with customer-centric case studies. You'll hear from senior executives from **Aspöck Systems, Ferrero, ASML Holding, Cargill, PCB Technologies, Nilit** and many others, who will share their experiences in successfully using SAP's Manufacturing Framework to create top performing working environments.

Whether you are already using SAP solutions to enhance your Manufacturing processes, or are currently evaluating your options, this conference is an ideal opportunity to gain a comprehensive understanding of how solutions from SAP can support your organization's strategic growth plan, allowing you to effectively consolidate functions, processes, and resources into a single strategic platform.

Download the brochure, register and find out more on the conference web site > <http://goo.gl/1GYfm9>.
