

8th Annual Land Forces Simulation and Training

13th-14th February 2017

London, United Kingdom

With combat environments becoming more diverse and complex, the demand for realism in training is crucial for land forces creating a robust representation of the physical, mental and ethical challenges on the battlefield.

Simulation systems and virtual training solutions are seen as a safe and viable alternative to live fire training and many nations and programme managers are looking to utilize this cost efficient and modern technology.

SMi Group's 8th Annual Land Forces Simulation and Training conference will focus on the growing importance to optimise the effectiveness, cost, efficiency and interoperability of training for individual nations and their allies. Covering all areas of land forces training, such as: the dismounted soldier, manned and unmanned vehicles, fire support, synthetic training, multinational exercises and simulation systems.

2017's unrivalled expert speaker line-up will include senior representatives from leading military nations: UK, USA, Germany, NATO, Czech Republic, Belgium and Poland and many more TBA!

Benefits of attending:

- Learn how land forces are ensuring they are mission ready for future combat demands
- Discover how future capabilities will be implemented and the benefits for military simulation & training
- Hear cutting edge presentations from key decision makers involved in procurement, training and simulation from across the globe
- Meet and network with programme managers and peers throughout the two day conference
