As Central and Eastern European nations continue to develop their land force mobility, fire support and protection, armoured vehicle remains a vital capability area for development. Future Armoured Vehicles Central & Eastern Europe returns once more this spring to proactively discuss the key challenges and opportunities surrounding the combat vehicle.

### Why Attend:

- Regional strategic updates from land force command and capability development including but not limited to: Austria, Bulgaria, Germany, Latvia, Lithuania, Romania, Slovenia and Turkey
- A key focus on the Czech MoD and development of next generation infantry fighting vehicle, 8X8 and MBT platforms
- An examination of the key combat vehicle capability areas and technologies enabling future lethality, survivability and C4I
- Perspectives and feedback from mechanised operations and multinational training
