## **AIMS AND SCOPE**

The 2018 International Conference for Critical Accounting (ICCA -- main meeting) provides a forum for exploring critical research on emerging issues in accounting, auditing tax and teaching. It brings together interested faculty, professionals, policy makers, accounting students and others concerned with professional and regulatory issues in the corporate, university, government, and financial sectors. The conference and our journal affiliates raise questions that currently face the profession, and seek radical changes in the conduct of accounting and auditing practice, education and research. The conference and our journal affiliates inquire original contributions that examine these issues of social, governmental, and corporate accountability which presently face professionals, educators, and scholars.

The following are illustrative, but not exhaustive of the general conference themes:
