

Join **Oxford Global's 19th Annual Drug Discovery Summit** on the 7- 8th June 2018 in Berlin, Germany to explore the latest innovations pushing industry to new heights. This congress will cover such areas as innovation, enabling technologies, new modalities and novel drug targets as well as covering key areas such as phenotypic screening, genome based drug discovery and small molecule drug discovery.

Bringing together over 300 senior level peers, the congress is once again co-located with our **6th Annual Discovery Chemistry and Drug Design Congress**. Delegates can expect to hear updates on discovery, medicinal and computational chemistry as well as medicinal chemistry in drug design. New for 2018 we'll be including deep dive sessions on DNA encoded libraries as well as presentations on data visualisation, protein-protein interactions and protein degradation.

VIEW AGENDA: <http://bit.ly/2mqWK5m>

Drug Discovery Summit Streams:

- Drug Discovery Innovation and Strategies
- Successful Phenotypic Drug Discovery and Other High Content Screening Tools
- Novel Drug Target Discovery for Immuno-Therapy, Autoimmune Diseases and Oncology
- Genome Based Drug Discovery, Screening, Imaging & Target Discovery

Discovery Chemistry & Drug Design Congress Streams:

- Discovery Chemistry, Medicinal and Computational Chemistry
- Drug Discovery Enabled Technologies; DNA Encoded Libraries
- Medicinal Chemistry and Drug Design: Novel Approaches
