

Biologics Europe:

This international conference is designed for those working in protein, antibody and biosimilar research.

At the Biologics and Biosimilars Congress, some of the most respected figures in the field will delve into the advances in discovery, design, optimisation, and regulation and what they mean for you.

Join us for 50+ presentations, 7+ hours of networking, 6 roundtable debates and 4 panel discussions taking place between the 5th and 6th of March.
