

## **6<sup>th</sup> Plant Genomics & Gene Editing Congress: Europe**

<http://www.global-engage.com/event/plant-genomics/#speakers>

Global Engage is pleased to announce the 6th Plant Genomics and Gene Editing Congress Europe, with the co-located Partnerships in Biocontrol, Biostimulants, and Microbiome Congress Europe, in Rotterdam on 14th and 15th May 2018.

Attracting experts working in all areas of plant science, the event will examine the latest in gene editing methods as well as exploring developments in NGS and omic technologies being used for progressing plant based research in aspects such as crop trait development, epigenetics, phenotyping, plant microbiome, and disease resistance as well understanding tools to overcome bottlenecks and enable successful data analysis and management.
