Biographical notes: Dr. Yang Xiao is an IEEE Senior Member. He was a voting member of IEEE 802.11 Working Group from 2001 to 2004. He currently serves as Editor-in-Chief for *International Journal of Security and Networks* and *International Journal of Sensor Networks*. He currently serves as an Associate Editor or on editorial boards for four other journals. He served as a guest editor for six journal special issues. His research areas include wireless networks, mobile computing and network security. He has published more than 70 journal papers with 36 papers published in various IEEE journals. He has edited/co-edited ten books in wireless networks and security.

1 Introduction

Network security is an extremely important field. However, there are very few journals for this field. *International Journal of Security and Networks* (*IJSN*) launched by Inderscience Publishers will publish outstanding original research papers as well as high calibre survey papers focusing on network security. *IJSN* proposes and fosters discussion on and dissemination of network security-related issues. The objectives of *IJSN* are to establish an effective channel of communication among industry, government agencies, academic and research institutions and persons concerned with network security-related problems. It also aims to promote and coordinate developments in the field of wireless/wired network security. *IJSN* provides a vehicle to help professionals, academics, researchers, developers, working in the field of wireless/wired network security to disseminate information and to learn from each other's work.

Topics suitable for *IJSN* include any security-related topics in wired/wireless networks, mobile computing, distributed computing, grid computing, pervasive computing, computer, etc.

We are very proud that our editorial board includes highly qualified individuals, representing an international panel of well-known experts around the world. We have already reached a wide range of audiences, who have submitted and/or are in the process of submitting manuscripts to *IJSN*. Several special issues have also been arranged.

This is the first issue of the new journal. *IJSN* promises to bring its readers an outstanding published work in all aspects of security. It also promises authors speedy publication. The first review turn around time for a submission is below six months on average, meaning that a paper can get accepted for *IJSN* as fast as a conference. We look forward to working with you to take *IJSN* to excellence.

Comments or suggestions are welcome. Special Issue proposals for important topics are also welcome. Finally, we welcome your contributions and encourage your libraries to subscribe *IJSN*. For more details about the topics and how to make your electronic submission/subscription, we invite you to visit the *IJSN* website at http://www.inderscience.com/ijsn.
