**Biographical notes:** Yung-Tse Hung received his PhD Degree in Environmental Engineering from University of Texas at Austin. His BSCE and MSCE Degree are from National Cheng Kung University, Taiwan. He has been a Professor of Civil and Environmental Engineering at Cleveland State University since 1981. He has also taught courses at 16 universities in eight countries. His research interests are biological waste treatment, industrial waste and hazardous waste treatment. He is Editor of *International Journal of Environmental Engineering*, Editor of *International Journal of Environment and Waste Management*, Guest Editor of Special Issue on *Industrial Waste Treatment, the International Journal of Environment and Pollution* and Co-Editor for several books.

---

On behalf of the entire Editorial Board, we would like to welcome you to this inaugural issue of *International Journal of Environmental Engineering (IJEE)*. The Editor of this new journal is Professor Yung-Tse Hung, who is also Editor, *International Journal of Environment and Waste Management (IJEWM)*. There are 19 Editorial Board members and six Editorial Assistants, who represent 16 different countries. Dr. Mohammed Dorgham, Editor-in-Chief, Inderscience, has been most helpful in the creation of our new journal.

IJEE has begun to publish outstanding papers from authors who are in the frontier of the research in a very broad field of environmental related areas. IJEE is a refereed journal. Many reviewers have contributed their expertise and time to review the manuscripts to ensure the quality of our journal. The excellent collaborative effort of editor, editorial board members, editorial assistants, authors and reviewers contributes to the creation and transfer of new scientific knowledge for the advancement of our environmental profession.

The missions and objectives of IJEE are to foster environmental protection and innovative solutions to ensure healthy, safe, and efficient industrial operations. It promotes feasible system design, development, and management bringing together the sustainable technologies, people, and sound processes. It provides cross-learning between various scientific and technological, as well as business and economics, disciplines comprising agriculture, fisheries, transportation, oil and gas, mining,

metallurgy, and areas of conflict, taking into account environment, health and safety, and public concerns.

IJEE covers a wide range of technical topics. Topics of interest include nature, environment, human activities, human intelligence, artificial intelligence and knowledge based systems, air, water and land pollution, toxic and radioactive pollution, water supply and resources, agriculture and fisheries, transportation, oil and gas, mining and metallurgy, industrial processing, resources management and processing, areas of conflict, environmental information technologies, environmental technologies, health and safety, marketing and economics, risk assessment and management, engineering innovations, development, and technical solutions and other environmental related areas.

IJEE publishes original papers, review papers, technical reports, case studies, conference reports, management reports, book reviews, notes, commentaries, and news. Special Issues devoted to important topics in environmental related areas will occasionally be published. For further information on paper submission, readers are encouraged to consult <http://www.inderscience.com/ijee>.
