
Reviewers 2011

In addition to the editorial team, *IJOGCT* received support from a vast number of scientists in various fields and from various organisations and countries in timely review of submitted manuscripts published in 2011. Their suggestions and critical comments have been useful in helping me to decide on their suitability and in enhancing the quality of articles published during 2011. In spite of their heavy schedule, these fine scientists have cooperated voluntarily with *IJOGCT* in the reviewing process and their time and efforts are greatly appreciated. It is our hope that they will continue to support *IJOGCT* by reviewing manuscripts as well as submitting articles or helping to receive manuscripts in the future.

On behalf of Inderscience, I am particularly indebted to the following people.
