This special issue of the *International Journal of Surface Science and Engineering* contains a selection of research papers related to tribology with special emphasis on surface engineering and lubrication. The papers were presented in the Ibertrib 2009, 5th Iberian Congress on Tribology, which was held in Coimbra, Portugal, on 17–18 June 2009.

We wish to express our thanks to Professor J. Paulo Davim and Professor Liangchi Zhang for permitting this publication. We would like, in addition, to express our appreciation to the contributors and reviewers of the papers for their strong and valuable efforts.
