\*Corresponding author

**Biographical notes:** Bidyut Kumar Patra is associated with the Department of Computer Science and Engineering of the National Institute of Technology Rourkela. He earned his undergraduate and Master degrees in Computer Science and Engineering from University of Calcutta, Kolkata, India. He earned his Doctoral degree in Computer Science and Engineering from Indian Institute of Technology Guwahati. He was awarded a Marie-Curie Fellowship for conducting postdoctoral research on recommender system in VTT Technical Research Centre of Finland, Finland. His research interests include data mining, machine learning and recommender systems. He is a reviewer of *Knowledge-Based Systems*, *IEEE Transactions on Man, Machine and Cybernetics*, and *Transactions on Rough Set Theory*.

Korra Sathya Babu is associated with the Department of Computer Science and Engineering of the National Institute of Technology Rourkela. He earned his undergraduate degree from JNTU Hyderabad. He obtained his Masters and Doctoral degrees in Computer Science and Engineering from National Institute of Technology Rourkela, Rourkela, India. His areas of interest include data science and social engineering. He is a regular reviewer of *Computer and Electrical Engineering*, and *International Journal of Data Mining and Knowledge Engineering*.

---

We are glad to present the special issue on ‘Advances in computing and applications’ which consists of extended version of only six accepted articles in the track computing from International Conference on Advanced Computing, Networking, and Informatics held during 12–14 June 2013 at Central Institute of Technology Raipur, India. We received a total of 138 articles in the computing track of ICACNI 2013. Only 17 were accepted for oral presentation in the conference. Based on the reviewer’s feedback and presentation quality, the authors of the 13 articles were advised to extend their work for this special issue. With rigorous review, only six were finally recommended to the Editor-in-Chief for publication in this special issue. The guest editors would like to thank all the authors for their contributions and reviewers for their expert comments.
