Transitioning from Globalized to Localized and Self-Reliant Economies is an insightful and timely contribution that explores the central themes of entrepreneurship, innovation, and economic localisation in a rapidly changing world. Edited by a group of highly accomplished scholars and experts, this book offers an all-inclusive and multifaceted viewpoint on the challenges and opportunities presented by the everchanging dynamics of the world economy. The main strength of the book lies in its ability to address a wide and diverse range of interrelated topics, offering readers with a holistic understanding of the issues at hand. From the effect of populism and nationalism on economic de-globalisation to the role of technological innovations in manufacturing resilience, each chapter probes a critical facet of economic transformation and offers valuable insights derived from rigorous and robust research work. One of the standout aspects of this book is the inclusion of contributions from scholars across the globe. This diversity of perspectives augments the richness of the book and ensures a global outlook on economic transformation. By encapsulating viewpoints from academia and industry, the book bridges the gap between practice and theory. The book is a must read for the researchers, policy makers, academicians and practitioners across the globe.

The book in hand is a comprehensive and thought provoking compilation that offers a wealth of knowledge and insights into the multifaceted dynamics of the global economy. Its diverse approach, well researched content, and relevance to current economic issues and challenges make it an indispensable and invaluable resource for anyone seeking a greater understanding of the forces influencing our economic landscape. The book addresses the thoughtful implications of the COVID-19 pandemic on several features of the economy. Chapters devoted to post-pandemic global trade, the role of higher educational institutions, and the resilience of healthcare services provide valuable

insights into the challenges and opportunities that lie ahead. The book also explores the emerging gig-economy and its potential for sustainable economic growth, elucidating on important regulatory models and framework. The editors have done an excellent job of organising the chapters in an eloquent, logical and coherent manner, permitting readers to navigate the book easily. The inclusion of chapter summaries and comprehensive references further improves its academic value, enabling readers to delve deeper into specific topics of interest. I highly recommend this book to policymakers, researchers, and practitioners who are interested in exploring the path towards a more self-reliant and localised economy in a rapidly changing world.
