Contents:

IJCSM publishes original peer-reviewed papers, which include research papers, comprehensive survey articles, conference reports and book reviews within the whole field of computing science and mathematics, and it will continue to provide information on the latest trends and developments in this ever-expanding subject. Special Issues devoted to important topics on computing science and mathematics and applications will occasionally be published.

Topics covered include:

- Numerical analysis
- Numerical algebra
- Numerical methods for ODE, PDE, FDE
- Computational geometry
- Computational fluid dynamics
- Computational optimisation
- Computational probability
- Statistical computation and simulation
- Computational intelligence
- Computational complexity
- Theoretical computer science
- Computational physics
- Computational biology
- Related applications in physics, engineering, chemistry, economics and the social sciences
