Scope of the Journal

Mining bioinformatics data is an emerging area at the intersection between bioinformatics and data mining. The objective of IJDMB is to facilitate collaboration between data mining researchers and bioinformaticians by presenting cutting edge research topics and methodologies in the area of data mining for bioinformatics. This perspective acknowledges the inter-disciplinary nature of research in data mining and bioinformatics and provides a unified forum for researchers/practitioners/students/policy makers to share the latest research and developments in this fast growing multi-disciplinary research area.

International Journal of
Data Mining
and Bioinformatics

www.inderscience.com/ijdmb

Topics covered include:

- Biological data pre-processing and cleaning
- Biological data visualisation
- Biological data integration and management
- Phylogenetics
- Biomedical ontologies construction/management
- Microarray data analysis
- Protein/RNA structure prediction
- Genomics and proteomics
- Drug design
- Biomedical literature data mining
- Modelling of biomolecular pathways
- Whole, multiple genome comparison
- Systems biology and pathways
- Biological data curation

Not sure if this title is the one for you?

Visit the journal homepage at **www.inderscience.com/ijdmb** where you can:

- View sample articles in full text HTML or PDF format
- Sign up for our free table of contents new issue alerts via e-mail or RSS
- View editorial board details
- Find out how to submit your papers
- Find out about subscription options, in print, online or as part of a journals collection

You can order online at **www.inderscienceonline.com** or download an order form from **www.inderscience.com/subform.**

This title is part of the Computing and Mathematics Collection (see **www.inderscience.com/cm**). For library collection subscriptions or for a free institutional online trial, please contact **subs@inderscience.com.**
