Scope of the Journal

ISSN: 1751-6048 (Print), ISSN: 1751-6056 (Online)

IJIMS covers the areas of manufacturing science and technologies, services theory and methods, and corresponding information/knowledge management issues. Its main features are to highlight the use of Internet or World Wide Web techniques, facing the new challenges brought about through network and distribution issues in the above areas. Contributions that deal with both academic research and industrial practices are included. IJIMS provides an international forum and source of reference for those wanting to find information about Internet manufacturing and services.

IJIMS is an Open Access-only journal and article processing charges (APCs) apply.

Topics covered include:

- Networked hardware units/systems, internet/web infrastructure, semantic web
- High performance computing, real-time information tracking, sensor networks
- AI and applications, mathematical methods, visualisation
- E-technology, networked virtual/digital equipment, internet/web applications
- Wireless manufacturing, RFID, remote online production, data management
- Web-based product LCE, product development/families design/platforms
- Knowledge engineering, remote management, networked MES
- Digital factory, design, manufacturing, machining, services, recycling
- CAD/CAPP/FEM/CAM/PDM/ERP, SPC, metrology, on-site quality management
- Product service tracking/monitoring/management
- Equipment fault diagnosis, remote maintenance, advanced engineering analysis
- Kansei engineering, requirements modelling, CRM
- Digital/extended enterprise, service optimisation, SME information services
- Workflow modelling/scheduling/management, process modelling/simulation
- Micro/nano-design/manufacturing, tissue engineering, bio-MEMS/manufacturing
