Scope of the Journal

ISSN: 1479-389X (Print), ISSN: 1479-3903 (Online)

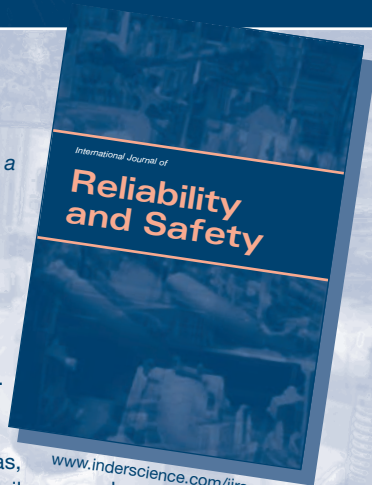

IJRS provides an authoritative source of information and an international forum in the field of reliability and safety. It is a highly professional and refereed journal that aims to achieve a balance between academic rigour and practical applications from all disciplines. In addition, prominent members of the reliability and safety community may serve as guest editors of special issues dedicated to a specific subject.

Contents:

IJRS publishes original research papers, review papers, case studies, book reviews, notes, commentaries and news. Multidisciplinary studies and research for interconnecting humans, technology and organisations are gladly received. IJRS also invites applied studies in (but not limited to) oil, gas, processing and mining industries; transportation, including railway, road, aviation and maritime; renewable energies such as wind, hydrogen, solar, hydro; manufacturing industries; network systems such as power distribution, telecommunication and other infrastructures; autonomous systems and robots; public sectors such as healthcare and municipal services. Contributions may be by submission or invitation. Suggestions for special issues and publications are welcome.

Topics covered include:

- Physics of reliability and safety
- Model-based system reliability assessment
- Data-driven reliability analysis
- Design for reliability and robustness
- Resilience engineering
- Reliability-centered maintenance
- Condition monitoring, fault diagnosis and PHM
- Risk and barrier analysis
- Risk-related decision making and risk management
- Accident investigation
- Standardisation and compliance management
- Emergency management
- Human factors and ergonomics
- Safety culture and organisation
- Insurance and safety-related economic analysis

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijrs where you can:
