Scope of the Journal

ISSN: 1745-0071 (Print), ISSN: 1745-008X (Online)

Over the past two decades, transition and innovation in organisations as a field of research has grown significantly, and its interdisciplinary connections with management, entrepreneurship, economics, psychology and sociology have encouraged its legitimacy. Recent developments have supported the recognition that organisations show heterogeneous behaviours and performances with respect to transition and innovation issues. This heterogeneity arises from intra-organisational and extra-organisational sources. The main goal of IJTIS is to encourage studies exploring all organisations in unique transitional and innovative contexts.

Subject coverage:

- Traditional strategy research topics (such as internationalisation, corporate entrepreneurship, cooperation, competitive dynamics, economic and non-economic performance, among others), but contextualised for organisations in emerging, developing and transition economies, with a specific focus on family firms
- Traditional management research topics (such as managerial succession, corporate governance, inter-generational entrepreneurship and management practices, among others), but contextualised in emerging, developing and transition economies, with a specific focus on SMEs
- Cultural aspects that frame organisations' values, norms and ethics in emerging, developing and transition economies
- Historical, sociological and anthropological perspectives to study organisations in emerging, developing and transition economies
- The role of government policies in the start-up, development or death of organisations in emerging, developing and transition economies
- Strategies adopted by organisations to counteract/compromise/comply with institutional isomorphism in emerging, developing and transition economies
- The economic and social impact of organisations in emerging, developing and transition economies
- Comparative studies considering differences and similarities between organisations in developed and developing countries, or among developing countries
