A Journal of the International  
Association for Vehicle Design

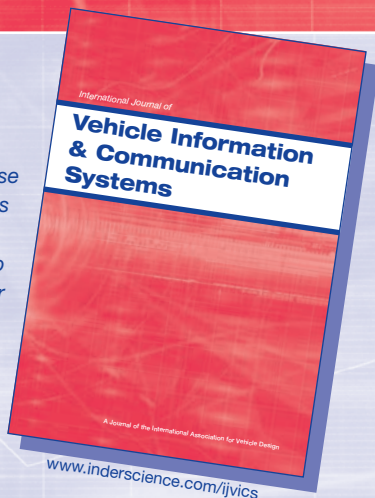

# Scope of the Journal

ISSN: 1471-0242 (Print), ISSN: 1741-8208 (Online)

*Information and communication systems of vehicles are the keys to make vehicles and transport systems smart. IJVICs focuses on novel/enhanced theories and applications of these two systems and their integration. It provides a forum for this important research area where the systems may assist the driver or even control the vehicle, big data analysis may help manufacturers build more convenient, comfortable and safer vehicles and the results may also be used to improve safety, efficiency and convenience of transport systems.*

## Topics covered include:

- Vehicular computers, human-machine interfaces, sensors and meters
- Real-time data processing, artificial intelligence, cloud computing, modelling and simulation
- Intelligent transportation, vehicle information, industrial IoT in vehicles
- Cooperative/V2V/V2I communications
- Positioning, localisation, navigation, mobility management
- Communication theory/protocols
- Vehicular wireless access technology
- Collision avoidance systems, vehicle behaviour models
- Quality of service, security, environmentally aware services
- Cooperative driving, intelligent/self-driving vehicles
- New energy vehicle and data management
- Cyber-physical systems
- Embedded vehicle engineering
- Engineering design of optimal systems
