

**Multi Powertrains in multi Scenarios__9th Zero-emission Heavy-duty Powertrain
China Summit on Jan 22-23, 2026 in Shanghai, China**

With highlights of Multi Powertrains for Low Carbon Future into CV and OHV market and based on the accomplishment of our last eight Future Heavy-duty Powertrain Summit series and the situation of HDV industry in China, the **9th Zero-emission Heavy-duty Powertrain China Summit 2026** will give a talk on **Latest Progress and Implementation Timeline of China VII and Non-road China stage V emission standards, Carbon Credit management policies for CVs, Global view towards 2030 on Alternative Fuels and Electrification for HDVs.**

Also all the industry leaders like **Cummins, Weichai, Yuchai, Daimler Trucks, FAW Jiefang Group, Dongfeng Commercial Vehicles, Sinotruk, GEELY Group, Caterpillar, SANY Group, XCMG, ZOOMLION, John Deere, YTO Group, Bosch, CATL, ZF** etc. will share their **Advanced diesel engine technologies meeting future China VII standards, Intelligent and high-efficient alternative fuel powertrains like LNG, H2, methanol, ammonia together with multi-scenario based hybrid systems (HEV, PHEV, REEV), BEV and FCV solutions for CVs and NRMM.**

International Journal of Powertrains (<https://www.inderscienceonline.com/journal/ijpt>) works as the publishing partner of this event for those selected publications.
