# Scope of the Journal

ISSN: 1755-0386 (Print), ISSN: 1755-0394 (Online)

*IJAIP fosters the exchange and dissemination of applications and case studies in the area of advanced intelligence paradigms among education and research professionals. The thrust of the journal is to publish papers dealing with the design, development, testing, implementation and management of advanced intelligent systems, and to provide guidelines in the development/management of these systems. IJAIP publishes archival articles and assessments of current trends, providing a medium for exchanging scientific research and technological achievements accomplished by the international community.*

## Contents:

IJAIP publishes original articles on current and potential paradigms and applications. Conferences reports, book reviews, notes, commentaries and news will continue to provide information on the latest trends and developments in this ever expanding area. Special Issues devoted to the relevant topics will also be published.

## Topics covered include:

- Advanced machine learning paradigms
- Soft computing
- Possibility theory
- Probabilistic reasoning
- Belief functions
- Rough sets
- Decision theory
- Philosophical foundation
- Psychological models
