Scope of the Journal

ISSN: 2049-6745 (Print), ISSN: 2049-6753 (Online)

Green, higher efficiency logistics is a trend in world industry. Besides being economically functional, automation-integrated logistics will result in lower costs, higher profit and is environmentally and socially friendly. IJAL will attract and disseminate original, theoretically advanced and practically oriented papers pertinent to automation and logistics. IJAL fosters and facilitates communication and networking among researchers in the area of automation and logistics and will stimulate the integration of automation and logistics to yield high-quality theoretical papers with practical application potential.

Topics covered include:

- Modelling, identification and simulation
- Evaluation and optimisation
- Planning, scheduling and coordination
- Strategy and planning in logistics
- Supply chain network optimisation
- Intelligent transportation system theory and application
- Intelligent distribution systems
- Advanced vehicle routing planning
- Management information systems in logistics
- Technology and equipment for logistics
- Logistics optimisation
- Automatic control with applications in logistics
- Intelligent control and automation
- Process automation
- Nanoscale automation and assembly

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijal where you can:

- View sample articles in full text HTML or PDF format
- Sign up for our free table of contents new issue alerts via e-mail or RSS
- View editorial board details
- Find out how to submit your papers
- Find out about subscription options, in print, online or as part of a journals collection
