# Scope of the Journal

ISSN: 1756-8412 (Print), ISSN: 1756-8420 (Online)

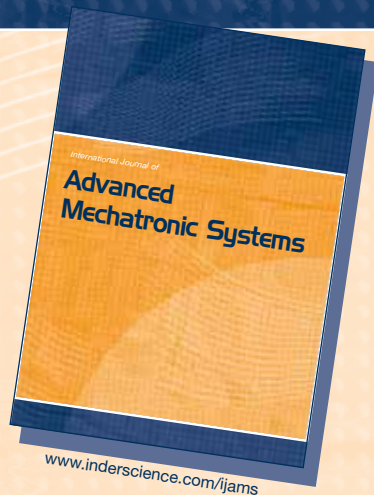

*Research and experiments in the synergistic integration of mechanical engineering, electronic control and systems concepts have contributed significantly to the design of systems, devices, processes and products. IJAMechS provides concise and quantitative expressions of the theoretical and practical developments in mechatronic systems and is set up to reflect the relevant generic studies.*

## Contents:

IJAMechS publishes original papers, review papers, technical reports, book reviews, commentaries and news. Special Issues devoted to important topics in advanced mechatronic systems will be occasionally published.

## Topics covered include:

- Mechatronics design philosophy
- Design of machines, devices and systems possessing a degree of computer-based intelligence
- Mechatronic system modelling, identification and control
- Instrumentation and manufacturing methods
- Design ideas on computer integration
- Robotics
- Mechatronic systems fault diagnosis and fault tolerance
- Networked mechatronic systems
- Applications of machine vision, image processing, pattern recognition and synthesis
