Scope of the Journal

ISSN: 1752-2862 (Print), ISSN: 1752-2870 (Online)

IJANS publishes original research contributions concerning mathematical modelling of nonlinear phenomena, fundamental theories, principles and general methods, computational methods and numerical simulations in nonlinear science and engineering. It presents the applications of nonlinear models to trending topics (e.g. brain-inspired intelligence) in natural and social science. IJANS also explores the background of nonlinear models, the development of innovative mathematical tools from nonlinear dynamical systems theory for analysing complex problems, new computational methods and computing techniques.

Contents:

IJANS publishes high-quality research and review articles. Special issues that focus on particular research areas, along with technical reports of interest, are also published.

Topics covered include:

- Chaos, fractals and other methods in nonlinear science
- Characterisation, control and prediction of nonlinear systems
- Computational and numerical solutions of nonlinear equations
- Mathematical modelling of nonlinear phenomena and processes
- Theoretical and computational applications of nonlinear methods

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijans where you can:

- View sample articles in full text HTML or PDF format
- Sign up for our free table of contents new issue alerts via e-mail or RSS
- View editorial board details
- Find out how to submit your papers
- Find out about subscription options, in print, online or as part of a journals collection

You can order online at www.inderscience.metapress.com or download an order form from www.inderscience.com/subform.

This title is part of the Science, Engineering and Technology Collection (see www.inderscience.com/set). For library collection subscriptions or for a free institutional online trial, please contact subs@inderscience.com.
