Scope of the Journal

ISSN: 1462-4605 (Print), ISSN: 1741-5004 (Online)

IJARGE proposes and fosters discussion on the evolution and governance of agricultural resources, with emphasis on the implications that policy choices have on both the welfare of humans and the ecology of the planet. This perspective acknowledges the complexity of the agricultural sector as an interface between ecological and socio-economic processes operating in parallel over different space-time scales, as well as the reflexive characteristic of human systems.

Topics covered include:

- Governance/management of agriculture on the human side
- Environmental and ecological impacts of agriculture
- Ecological economics applied to agriculture
- Definition of "quality" in food production
- Development of an adaptive eco-system approach to agriculture
- Globalisation and trade liberalisation affecting agriculture
- Coevolution, biodiversity and non-equilibrium systems
- Issues of research relating to agriculture
- The production of quality food
- Ecological and green agriculture, animal welfare, pollution management
- Ecological economics and heterodox approaches to complex problems
- Analysis/assessment of policies in relation to agriculture/environment
- Equity and gender issues in agriculture
- Development, environment and agriculture
- Sustainability, agriculture and environment disciplines
