Scope of the Journal

ISSN: 1752-6418 (Print), ISSN: 1752-6426 (Online)

IJBET addresses cutting-edge research in the multi-disciplinary area of biomedical engineering and technology. Medical science incorporates scientific/technological advances combining to produce more accurate diagnoses, effective treatments with fewer side effects, and improved ability to prevent disease and provide superior-quality healthcare. A key field here is biomedical engineering/technology, offering a synthesis of physical, chemical, mathematical and computational sciences combined with engineering principles to enhance R&D in biology, medicine, behaviour, and health. IJBET includes the Asia-Pacific Chapter in Biomedical Wireless Technology (APC-BWT).

Topics covered include:

- Artificial organs
- Automated patient monitoring
- Advanced therapeutic and surgical devices
- Application of expert systems and AI to clinical decision making
- Biomaterials design
- Biomechanics of injury and wound healing
- Blood chemistry sensors
- Computer modelling of physiologic systems
- Design of optimal clinical laboratories
- Medical imaging systems
- Sports medicine

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijbet where you can:

- View sample articles in full text HTML or PDF format
- Sign up for our free table of contents new issue alerts via e-mail or RSS
- View editorial board details
- Find out how to submit your papers
- Find out about subscription options, in print, online or as part of a journals collection

You can order online at www.inderscienceonline.com or download an order form from www.inderscience.com/subform.

This title is part of the Healthcare and Biosciences Collection (see www.inderscience.com/hb). For library collection subscriptions or for a free institutional online trial, please contact subs@inderscience.com.
