# Scope of the Journal

ISSN: 2051-5847 (Print), ISSN: 2051-5855 (Online)

IJBSE focuses on business intelligence and decision support, together with system strategy, policy and application. It also covers production planning, scheduling and operation management along with advanced information systems, including theoretical foundations, infrastructure, architecture and algorithms. The journal proposes and fosters discussion on new system theory and information technology, including state-of-the-art research reports, important techniques and practical applications in emerging topics in the area.

## Topics covered include:

- Data warehousing/mining, database processing/schema
- Data and knowledge visualisation, knowledge discovery and management systems
- Intelligent decision support, business intelligence architecture
- Lean/active/dynamic systems
- Information retrieval, human-computer interaction
- Enterprise/organisational information strategy, enterprise performance management
- Information quality, security, privacy
- Soft/hybrid computing, agent architectures/systems
- Organisational operation management and strategy
- Uncertainty management, insufficient information decisions
- Production planning, scheduling
- Supply chain management
- Artificial intelligence applications to business decision making
- Online analytical processing, predictive analysis, text mining
- Applications: biomedical systems, intelligent services, cloud computing, etc.
