Scope of the Journal

ISSN: 1741-8763 (Print), ISSN: 1741-8771 (Online)

Business processes play key roles in enabling business application integration/collaboration across multiple organisations. Integration can be categorised into two types: internal and external. To stay competitive, companies must be agile in adapting processes to ever-changing market dynamics, looking beyond traditional enterprises/marketplaces through collaborative interactions and dynamic e-business solutions. The enterprise infrastructure must provide capability for dynamic discovery of trading partners/service providers and enable federated security mechanisms, solution monitoring/management. IJBPIIM highlights business process modelling, simulation, integration and management using emerging technologies.

Topics covered include:

- Mathematical foundation
- Process modelling methodology
- Process integration architecture
- Collaborative processes
- Extended collaboration architecture/solutions
- Business transformation
- Ontology and business rules
- Enabling technologies
- Performance analysis
- Case studies
- Security and privacy
- Return on investment
- Requirements analysis
