Scope of the Journal

ISSN: 1758-9401 (Print), ISSN: 1758-941X (Online)

World-class organisations realise that non-integrated manufacturing processes, non-integrated distribution processes and poor relationships with suppliers and customers hinder success. The impact of an organisation's plan on the whole supply chain is unpredictable before its execution. Simulation permits evaluation of operating performance prior to execution of a plan. IJBPSM covers original, high-quality and cutting-edge research on all aspects of supply chain modelling, aiming at bridging the gap between theory and practice with applications analysing the real situation to improve business performance.

Topics covered include:

- Business performance modelling, strategy
- Vendor/supplier selection, supplier development, purchasing management
- Supply chain management (SCM), green supply chain modelling
- Reverse logistics, closed loop/knowledge-based supply chains, 3PL/4PL
- Sustainable/quality based/agile/leagile/intelligent SCM
- Supply chain performance/optimisation/risk/decision making/support systems
- AI, information sharing in SCM, systems approach to SCM
- Coordinated/global/flexible SCM, risk mitigation strategies
- Stochastic supply chain games
- IT-enabled SCM, fuzzy modelling, data mining
- Supply chain network management, modelling/simulation, implementation
- Training/education, information security, RFID
- Supply chain analysis, transportation decisions, vehicle routing, bullwhip effect
- Logistics in disaster management
- Cross-country comparison
