Scope of the Journal

ISSN: 1740-0546 (Print), ISSN: 1740-0554 (Online)

IJCAST aims to address various emerging complexities in applied science and technology by disseminating novel intelligent methodologies and techniques. These new methods and technologies will reveal the principles underlying various engineering applications.

Contents:

IJCAST publishes original papers, review papers, technical reports, case studies, book reviews, notes, commentaries and news. Special Issues devoted to important topics such as supply chain complexity, evolutionary design and the economics of operational complexity will occasionally be published.

Commentaries on papers and reports published in the Journal are encouraged. Authors will have the opportunity to respond to the commentary on their work before the entire treatment is published. Contributions may be by submission or invitation, and suggestions for Special Issues and publications are welcome.

Topics covered include:

- Evolutionary algorithms
- Particle swarm optimisation
- Single-/multi-/many-objective optimisation
- Constrained optimisation
- Multi-modal optimisation
- Dynamic optimisation
- Data-driven optimisation
- Large-scale optimisation
- Engineering design optimisation
- Applications associated with intelligent computation
- Machine learning
- Big data

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijcast where you can:

- View sample articles in full text HTML or PDF format
- Sign up for our free table of contents new issue alerts via email or RSS
- View editorial board details
- Find out how to submit your papers
- Find out about subscription options, in print, online or as part of a journals collection

You can order online at www.inderscienceonline.com or download an order form from www.inderscience.com/subform.

This title is part of the Management and Business Collection (see www.inderscience.com/mb). For library collection subscriptions or for a free institutional online trial, please contact subs@inderscience.com.
