Scope of the Journal

ISSN: 1757-1170 (Print), ISSN: 1757-1189 (Online)

IJCEE explores the intersection of economics, econometrics and computation. It investigates the application of recent computational techniques to all branches of economic modelling, both theoretical and empirical. IJCEE aims at an international and multidisciplinary standing, promoting rigorous quantitative examination of relevant economic issues and policy analyses. The journal's research areas include computational economic modelling, computational econometrics and statistics and simulation methods. It is an internationally competitive, peer-reviewed journal dedicated to stimulating discussion at the forefront of economic and econometric research.

Topics covered include:

Computational Economics

- Computational techniques applied to economic problems and policies
- Agent-based modelling
- Control and game theory
- General equilibrium models
- Optimisation methods
- Economic dynamics
- Software development and implementation

Econometrics

- Applied micro and macro econometrics
- Monte Carlo simulation
- Robustness and sensitivity analysis
- Bayesian econometrics
- Time series analysis and forecasting techniques
- Operational research methods with applications to economics
- Software development and implementation
