# Scope of the Journal

ISSN: 1751-5874 (Print), ISSN: 1751-5882 (Online)

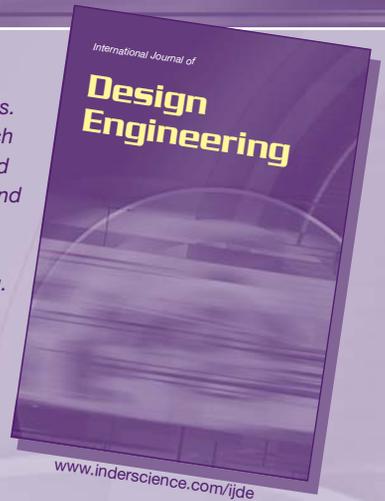

*Design is an important aspect in almost all engineering fields. IJDE proposes and fosters discussion on up to date research findings and achievements in design engineering and related areas, and identifies new technology requirements, needs and priorities in those areas. It offers the reader a wealth of valuable material on theories and practices which underpin successful research and development in design engineering.*

## Contents

IJDE publishes original papers, review papers, technical reports, conference reports, case studies, book reviews, and news. Special Issues devoted to important topics in design engineering and related areas will occasionally be published.

## Topics covered include:

- Product, engineering and industrial design
- Design in engineering subject areas
- CAD, CAM, CAE
- Design for sustainability and renewable energy
- Web/internet technologies and wireless computing in design engineering
- Design management
- Integrated design and manufacturing, concurrent engineering
- Mechanical transmission and machine elements
- Tribology and lubrication in design engineering
- Mechanics and mechatronics, heat transfer and fluids
- Design optimisation and finite/boundary element methods in design engineering
- Agile manufacturing
- Rapid prototyping
- Experimental and theoretical analyses in design engineering
- Advanced computing in design engineering
